

Zhuguang Passage Project Committee: Meeting 1 - 4/8/2015, 2:00-3:00

Present: Marcel Gauthier, Abby Torres, Chris Levesque, Joanne Chung, Mark Hevland, Sandy Hong

AGENDA and MINUTES

1. What is our purpose?

The purpose of the ZPPC is to gather information on the Zhuguang Passage Project, understand the impact of the project on school life, communicate relevant information to the Puxi SAS community, and identify further areas inquiry and action for the school.

1. What do we know for sure?

We do know that at this point the start of the project is in September as a best guess; part of Jinfeng Lu will be closed but most like only from Beiqing Lu to the intersection of Jinfeng Lu and Xingle Lu; the hole for the tunnel is scheduled to be located in the intersection of Jinfeng Lu and XingLi Lu; the project is scheduled to run for three years; it will in some way have an impact on our traffic patterns, noise and air. So in general we have a strong but not exact idea of the following:

- proposed project and its details*
- stated environmental impact*
- construction details*
- hypothetical impact on the school, pick up and drop off*

1. What are the sources of our information? Who have we talked with so far? What are further avenues of inquiry?

Huacao Vice Mayor, Environmental Impact Report, WWG Residents, Shanghai Government website, Minhang District officials

Future lines of inquiry: AmCham, Am Consulate

1. What further questions would we hope to understand?

- impact on air pollution of construction and finished project*
- impact of travel on Jinfeng Road*

- relevant info in full environmental impact report
- how we will address drop off and pick up during construction
- can we send a "wish list" -- to whom? who would listen?

1. What do we communicate to the parents and how?

- info session at school -- when?
- area of website where we post updates as they become available
- powerschool updates as needed

1. Next Meeting

Wednesday, April 22, 1:00

FURTHER NOTES: Sandy is reading the full environmental report to see what portions we should translate for the school to review. Also, we will hopefully have a couple of more parents at our next meeting. MG
