There are 5 things every student/family must do before returning to campus.

1. Submit Student Health Information Registration Form
   - Student health information must be submitted no more than three days prior to the student returning to campus. A separate email with details will be sent at that time.

2. Copy Quarantine Completion Form
   - A copy of a student’s Quarantine Completion Form must be collected at the gate on the first day of the student’s return. If forms have not been received by your respective neighborhood committee, a self-quarantine completion confirmation within the Student Health Information Registration Form will also be acceptable.

3. Copy Nucleic Acid Test Form
   - For those who arrived in Shanghai after March 28, a copy of the Nucleic Acid Test must be collected at the gate on the first day of the student’s return. This form should be received by medical professionals during the arrival process in Shanghai.

4. Complete Epidemic Prevention and Awareness Training
   - Before entering SAS campuses or buses, students AND parents are required to complete the Epidemic Prevention and Awareness Training. See email sent May 2 for details.

5. Complete Daily Health Forms
   - Parent or guardian must take their child’s temperature and print and fill out a commitment letter and health form each morning before the child is allowed to enter SAS campuses or buses. Forms will be collected at the gate each morning. Both forms are available using the QR codes below.
